

A faint, light gray watermark of classical architecture is visible in the background. It features a series of four columns supporting a horizontal entablature, with a triangular pediment above. The watermark is centered and serves as a subtle background for the text.

## REPORT OF THE SUPERINTENDENT OF SCHOOLS

---

To the Citizens of Carthage:

I have the honor to present for your consideration the annual report of the condition of your schools. My second year's work among you has been very pleasant and I wish to take this opportunity to thank the teachers and the School Committee for their co-operation in the administration of school affairs.

The attendance has not been as good as last year, it being 74% as against 76% a year ago. The winter term had the best attendance for the year, 82.2%. The average for the spring term was 73% and for the fall term, 66.9%. The low average in the spring was caused by pupils entering and leaving in the middle of the term. This fall there has been a lot of sickness and most of the absences have been excusable. I think on the whole parents are making more of an effort to have their children attend school regularly and are beginning to realize more their responsibility to them in the matter of education. If a parent has the future welfare of his child at heart, that child will be a regular attendant at school unless prevented by illness.

At the end of the spring term the Stickney school was discontinued, there being only four children left in that neighborhood to attend school. They are being transported to the Towle school in Dixfield at an expense of \$5.00 per week. The tuition will be \$4.00 per week making the total expense less than the cost of maintaining a school.

The Potter and Ellis schools have been combined this year as has been done in previous years. The Winter term at the Ellis and the spring term at the Potter were taught by Mrs. Eva Williams. The fall term was taught by Miss Helen Kimball.

These teachers have not had the benefit of previous experience or training but they have worked for the best interests of the school and good progress has been made.

Mrs. Coburn at the Newman has continued to keep this school in a state of improvement. She has the faculty of getting a lot of work out of her pupils and the results obtained are to be commended. Three tuition pupils from Weld are attending this school at the present time, making the school larger than it has been for some years.

A very successful term was taught at the Mills by Miss Addie Taylor last Spring. The attendance was good and a marked improvement was shown. Mrs. White is keeping up the good work and although handicapped by a very poor attendance, the school is successful.

The High School situation has been a problem. It was a question as to the advisability of maintaining a High School with so few scholars, but after much discussion it was decided to do so. This is now a B grade school which provides for only the first two years of standard High School work. By special permission of the State Department, however, the upper classes have been able to continue their work. Whether or not this school will be maintained after July 1st is a question to be decided by the State. I would recommend, however, that the Town raise sufficient funds to run the school for another year. Then if it is decided not to maintain the school, the money will be available for tuition purposes.

We were very fortunate in securing the services of Ralph C. Masterman as Principal for the present year. Mr. Masterman is a young man of excellent mental and physical attributes and has been doing a world of good

in this school. The students are working very industriously and it is very pleasing to report an improvement in every department.

The schools are well supplied with text books and a large appropriation will not be needed. The only new book necessary is a History for the 6th grade in order to follow the course of study as outlined by the State.

The buildings are in fairly good condition. There is need of some inside repairs at the Newman also the shed and outbuildings need shingling. I tried to get this work done this year but was unable to get anyone to do it. Only ordinary repairs are needed at the other buildings.

New blackboard surface has been provided at the Stickney, Ellis and Newman and a few maps have been purchased.

I am pleased to report that only one account is overdrawn, that of common schools. This was caused by an increase in the cost of fuel, janitor work and transportation. We have paid our teachers a better salary but the discontinuance of the Stickney school has lowered the total amount paid for teaching. Our school expenses are bound to be more and it is impossible to estimate the exact amounts necessary for the ensuing year. Your Committee and I have carefully considered the following list of Estimates and, although the total shows an increase of 18% over last year we could not conscientiously recommend any less amounts.

Respectfully submitted,

H. W. COBURN, Supt.
